

Raphael Ludwig

Quantitative Economist | raphaludwig@gmail.com | linkedin.com/in/raphaludwig

Experience

Economist — Vista Capital, Dec 2020 – May 2026

- Structured the Macro Research area from inception with the chief economist — processes, analytical routines, data infrastructure, and research products used daily by the fund.
- Built a proprietary macroeconomic data platform (Docker on Linux, later migrated to Prefect) with autonomous monitoring, alerts, and automatic reports; maintained 250+ internal data routines.
- Developed and coordinated macro projection models, including a proprietary model-selection algorithm and an automated short/medium-term forecasting system.
- Replicated and adapted empirical exercises from central banks, academic papers, and sell-side research; built internal AI-based automation tools (Claude Code).
- Led Brazil and Europe (Euro Area, UK) macro coverage — data, scenario analysis, meetings with policy actors — plus thematic coverage (e.g., Covid-19, supply chains).
- Trained intern cohorts in programming and macro topics; led internal trainings on economics, automation, and applied AI.

Education

MSc in Economics — PUC-Rio, Jan 2019 – Jul 2021 Dissertation: “*On the Missing Disinflation Puzzle: A Data-Driven Approach*” (advisors: E. Zilberman, M. Medeiros).

BSc in Economics — PUC-Rio, Jan 2013 – Jul 2017 PET/PIBIC research programs (forecasting, machine learning); TA for Programming Techniques for Economics II. Thesis: “*Nowcasting Unemployment with Google Trends: Evidence from the Brazilian Labor Market*”.

Skills

Quant macro research — forecasting, nowcasting, applied econometrics, machine learning, scenario analysis.

Programming & data — R, Python, MATLAB/Octave, Dynare, Git. **Infrastructure** — Docker, Linux/VMs, Prefect, Airflow, Shiny, Streamlit, JavaScript.
